At PepsiCo, we know that our company can only succeed when our associates and the society we serve flourishes.

That’s why we are committed to fostering a diverse workforce by creating a collaborative, equitable and inclusive space where everyone, regardless of what we look like, where we come from or who we love, has a voice.

A space where we aren’t just heard, but we are actively listened to.

A space where we don’t just talk, but we are free to speak fearlessly.

A space where we’re not just content, but we are confident.

Because when we have a space to authentically be ourselves and explore each other’s ideas with compassionate curiosity, can we move from uniformity to diversity.

From diversity to equity and inclusion.

Only when we are open about our identity, our story, our highs and our lows, can we deliver more smiles, and build a better workplace for our people and better world for our business partners and communities.

PepsiCo DE&I
A space to be you
A space to be
As one of the largest food and beverage companies in the world, PepsiCo does business in hundreds of markets, each with their own culture, character, and history. To compete on this scale, we must understand the unique needs of local consumers and put them at the center of everything we do, from our products and campaigns, to our partnerships and innovations.

That is why Raising the Bar on Talent and Diversity is a key behavior of our culture, The PepsiCo Way. This ensures that diversity, equity, and inclusion are embedded in our DNA and tightly woven into our strategy. Once nurtured, this not only provides a competitive advantage in the marketplace, it also fosters an environment of dignity and respect for employees of every race, background, orientation and belief.

To me, the ultimate objective is to become a company that is focused on equity and genuinely inclusive. We want anyone who walks into our offices or premises to feel that they don’t have to change, that they don’t have to be someone else to reach their maximum potential, and that they have tools to meet their specific needs and goals.

During a year of so much adversity, this has never been more critical. Throughout the pandemic, our associates embraced the opportunity to drive positive change amongst our teams and beyond our walls. In this year’s Global Diversity, Equity, and Inclusion Report, you will read about our actions across three distinct pillars: People, Business, and Community.

You will also read personal accounts from our associates across the world. Their amazing talent, dedication, and passion have enabled us to progress toward our gender parity goal, increase diverse representation at the managerial level, and improve pay equity -- all essential elements of realizing our aspiration to be not only a successful company, but a sustainable one. A company that can best meet the needs of its consumers, customers, and communities, whilst delivering on our mission to Create More Smiles with Every Sip and Every Bite.

Like many of our peers, PepsiCo is on a journey from awareness to commitment to action. I am proud to say that our commitment to equity and inclusion is stronger today than at any time in our history. We understand that diversity of thought and experience gives us valuable strategic insights, fuels our innovation, and helps us attract the best talent. But even though I am proud of our progress, I know there is still more work to do.

As we take the next steps on our journey, we will remain committed to the principles of diversity and transparency, whilst stepping up our action in partnership with employees, consumers, customers, and communities. Only by working together can we reach PepsiCo’s DE&I goals and, most importantly, become the kind of society we aspire to build.

Bringing Equity to life at PepsiCo

Ronald Schellekens

As you’ve read in this report, equity is a state, more than just a step. It’s achieved when our associates are able to grow and succeed because they have the resources and opportunities tailored to their specific needs.

To reach true equity at PepsiCo, our focus is on identifying barriers and strategizing to remove them. This means further evaluating our recruitment, development, and retention practices, reshaping the workplace culture to foster inclusion, and better mitigating unconscious bias and stereotypes.

Equality

By training our associates to look across dimensions of diversity and inclusion, we can model the change we seek.

To reach equity in our society, in addition to strengthening local businesses, our focus is also supporting students with access to higher education. Through our $40 million scholarship and mentorship program, we aim to support 4,000 students because education is a key pathway to better pay, greater job opportunities and long-term economic security.

We’ve made good progress, yet, we know our efforts are the first steps towards building a more equitable workplace for our people, and a world for our business partners and communities.
