On May 22, 2025, PepsiCo announced refined agriculture, climate, water and packaging goals. This ESG Performance Metrics reflects PepsiCo's 2023 progress against our previous pep+ goals. For our current pep+ goals, please see <u>PepsiCo Positive Goal Evolution Graphic</u> and our <u>ESG Topics A-Z pages</u>.

ESG Performance Metrics The information within this PDF is accurate as of June 20, 2024. Unless otherwise noted, our sustainability data reflects progress made during the calendar year (ending December 31, 2023), whereas our financial reporting corresponds with our fiscal year, which ends on the last Saturday of December.

As a general matter, recent organizational changes (e.g., acquisitions and divestitures) are reflected in our reporting as soon as practical. Unless otherwise noted, goals and progress reflect the impact of our acquisitions of Hangzhou Haomusi Food Co., Ltd. (Be & Cheery), Pioneer Food Group Ltd. (Pioneer Foods), and SodaStream International Ltd. and our divestiture of Tropicana, Naked and other select juice brands (Tropicana).

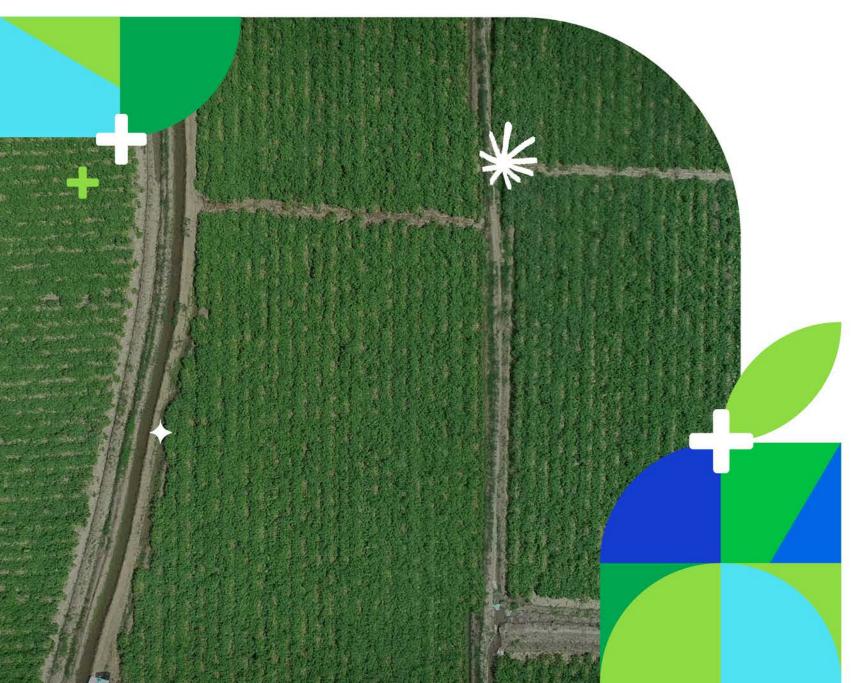

Organizational changes (e.g., acquisitions, mergers, and divestitures) are evaluated to determine if they have a significant impact on our sustainability performance and, as data becomes available, all reported years for metrics impacted by an organizational change are recast to consistently reflect the impact of the organizational change.

Targets apply to PepsiCo's operations as well as our value chain (e.g., franchise bottlers, joint ventures where PepsiCo has operational control, comanufacturers, etc.) unless otherwise noted.

Our Environmental, Social and Governance (ESG) reporting suite includes multiple resources available online that explain our approach to help build more sustainable food systems. This document reflects progress against our pep+ goals, as they were structured in 2023.

For detail on how we measure performance against these goals, see <u>Calculation methodology</u> on ESG Topics A-Z.

| Spread the adoption of regenerative agriculture practices across 7 million acres of the land used around the world to grow our crops and ingredients for our products ¹ | 7 million acres | >1.8 million acres | >900,000 acres | >345,000 acres | | |
| Advocate for and contribute to a measurable improvement in the health of high water-risk watersheds where we directly source our crops, including an improvement in water-use efficiency of 15% by 2025 ² | 15% (2025 Target) | 22% | -% | -% | any changes are warra goal ahead of schedule we will continue our wo | r pep+ goals and consider whether nted. As a result of achieving this e, we will no longer report on it. But ork in watershed health through emain focused on continuous |
| Sustainably source 100% of our key ingredients, expanding to include not only our grower-sourced crops (potatoes, whole corn and oats), but also key crops from third parties, such as vegetable oils and grains ³ | 100% | -58% | ~55% | -50% | | |
| Improve the livelihoods of more than 250,000 people in our agricultural supply chain and communities through dedicated programming aiming to support economic prosperity, farm and farm worker security and women's economic empowerment ⁴ | >250,000 people | >57,000 people | >11,000 people | Goal introduced with the launch of pep+ in 2021. | | |

¹ PepsiCo considers an acre as delivering regenerative impact when the adoption of regenerative agriculture practices results in quantified improvements across at least two of the environmental outcome areas, with a strong preference for removing or reducing GHG emissions to be one impact area. Refer to PepsiCo's Regenerative Agriculture Practice Bank for a comprehensive listing of practices directly or indirectly linked to the five impact areas. Regenerative acres reported represent the annual count in each year presented based on actions undertaken

² Measured versus a 2015 baseline. This metric tracks the improvement of the water-use efficiency of PepsiCo's direct agricultural supply chain. To focus efforts on implementing sustainable practices, we currently collect and publish agricultural water-use efficiency data at least once every three years. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years. Results reflect assessments performed in 2023, 2020 and 2018

³ For grower-sourced crops, sustainable sourcing refers to meeting the independently verified environmental, social and economic principles of PepsiCo's Sustainable Farming Program (SFP). For supplier-sourced crops, sustainable sourcing is achieved through a third-party standard that has been benchmarked as equivalent to the SFP or, in limited regions, a continuous improvement program addressing the main environmental and social risks with growing the relevant crop. Sustainably sourced volumes are verified by third parties, including Roundtable on Sustainable Palm Oil (RSPO) - certified palm oil and Bonsucro-certified (or equivalent) cane sugar. Certain legal and systemic barriers will challenge us as we strive toward our goal of sustainably sourcing 100% of our key ingredients. For example, certain jurisdictions prohibit farmers from holding legal rights to the land they farm (a component of our sustainable sourcing goal applies to areas where PepsiCo has purchasing control and excludes joint ventures, franchises, co-manufacturers and co-packers and other third parties over which we do not hold purchasing control. Key ingredients are listed in the Agriculture ESG Topics A-Z page

⁴ Metric counts the cumulative people impacted since 2021

¹ In 2023, we remeasured the 2021 reported results to reflect the 2015 baseline that was recalculated following the divestiture of Tropicana

² In 2023, we continued to enhance our calculation methodology and reflected the inclusion of additional data. Where actual data was not available, estimated data was used

³ In 2023, we further remeasured the 2015 baseline to reflect the divestiture of Tropicana, enhancements in our calculation methodology and the inclusion of additional data. Where actual data was not available, estimated data was used

Positive Value Chain: Water

| Metrics marked with a star signify |
|------------------------------------|
| third-party limited assurance |

| Target metrics | 2030 Target | 2023 | 2022 | 2021 | third-party limited assurance Comments |
|---|-----------------------------|---------------|------|------|---|
| Improve operational water-use efficiency by 25% in high water-risk areas by 2025 ¹ | 25% (2025 Target) | 25% | 22% | 19% | After 2023, we will no longer report on this goal. Instead, our reporting focus will shift to our work to become net water positive, including progress against our aggressive 2030 goals aimed at world-class and best-in-class operational water-use efficiency. Metric assured since 2015 |
| SEEK TO HAVE NET WATER POSITIVE IMPACT BY ACHIEVING: | | | | | |
| Best-in-class water-use efficiency in 100% of high water-risk PepsiCo and thir | d-party manufacturir | ng facilities | | | |
| High water-risk beverages facilities (liters/liter) ² | 1.2 | 1.7 | 1.7 | 1.8 | Metric assured since 2021 |
| High water-risk convenient foods facilities (liters/kg) ³ | 0.4 | 2.3 | 2.4 | 2.4 | Metric assured since 2021 |
| World-class water-use efficiency in all other PepsiCo and third-party manufact | uring facilities | | | | |
| Non high water-risk beverages facilities (liters/liter) ⁴ | 1.4 | 1.8 | 1.7 | 1.8 | 2023 results reflect the adverse impact of year-over-year decrease in production output in certain markets. This had the effect of reducing capacity utilization and water-use efficiency as a result. Metric assured since 2021 |
| Non high water-risk convenient foods facilities (liters/kg) ⁵ | 4.4 | 5.2 | 5.3 | 5.0 | Metric assured since 2021 |

¹ Measured versus a 2015 baseline. Goal reflects the exclusion of third-party facilities. Between 2006-2015, water-use efficiency improved by 26% in global legacy operations at the date of target setting. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years

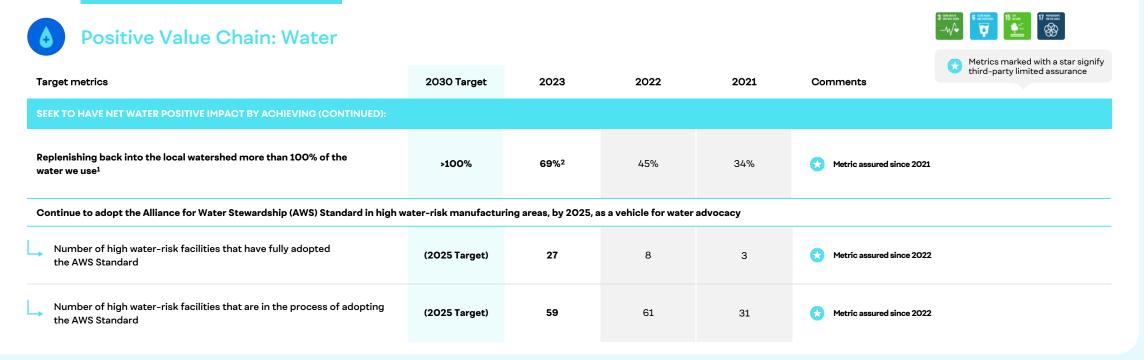

² Best-in-class water-use efficiency for beverage facilities is defined as 1.2 liters of water (or less) per liter of beverage production. We do not currently capture data from third-party manufacturers and are evaluating how to obtain and include information from our top third-party manufacturers in future calculations. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years

³ Best-in-class water-use efficiency for convenient foods facilities is defined as 0.4 liters of water (or less) per kg of convenient foods production. We do not currently capture data from third-party manufacturers and are evaluating how to obtain and include information from our top third-party manufacturers in future calculations. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years

⁴ World-class water-use efficiency for beverage facilities is defined as 1.4 liters of water (or less) per liter of beverage production. We do not currently capture data from third-party manufacturers and are evaluating how to obtain and include information from our top third-party manufacturers in future calculations. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years

⁵ World-class water-use efficiency for convenient foods facilities is defined as 4.4 liters of water (or less) per kg of convenient foods production. We do not currently capture data from third-party manufacturers and are evaluating how to obtain and include information from our top third-party manufacturers in future calculations. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years

pepsico.com/our-impact/sustainability/esg-summary • pepsico.com/our-impact/esg-topics-a-z

¹ 2030 goal tracks replenishment tied to company-owned and third-party facilities in high water-risk areas. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years. The reported replenishment volumes for company-owned facilities are currently being capped at 100% per location. Once we achieve 100% for each company-owned location, we will start to then report progress of more than 100% replenishment. We do not currently capture data from third-party manufacturers and are evaluating how to obtain and include information from our top third-party manufacturers in future calculations

² We continue to measure progress against our original 2025 goal and our extended 2030 goal. World Resource Institute's Aqueduct water stress assessment tool is used to reconfirm high water-risk areas every three years. In 2022, an updated water risk assessment identified additional company-owned high water-risk facilities, which are in-scope for calculating progress against our 2030 goal only. Excluding these additional company-owned facilities water usage, we replenished 82% of water used in high water-risk facilities in 2023, representing progress against our original 2025 goal. See <u>Calculation methodology</u> on ESG Topics A-Z for additional details

Positive Value Chain: Packaging

| Metrics marked with a star signify |

|--|-------------|------|-------|---|----------------------------|--|
| Cut virgin plastic from non-renewable sources per serving across our global beverages and convenient foods portfolio by 50% through: ¹ | 50% | 1% | (2)% | 2% | Metric assured since 2021 | |
| Scaling new business models that avoid or minimize single-use packaging materials (e.g., models that reuse, refill, prepare at home, utilize concentrates like powders, drops, etc.), with the aim of delivering 20% of all beverage servings we sell through reusable models by 2030 ² | 20% | 10%³ | 10%4 | Goal expanded in late 2022 with first year reporting in 2023. Metric not measured in prior years. | Metric assured in 2023 | |
| Reducing our absolute tonnage of virgin plastic derived from non-renewable sources by 20%, including by seeking to: ¹ | 20% | (6)% | (11)% | (5)% | that do not allow, or have | n markets, particularly in markets only recently allowed, rPET in food sented challenges to virgin plastic |
| Our actions include: - Use market-leading bio-based and renewable materials • Committing to replace plastic rings with paperboard on beverage multipacks in the U.S. and Canada to reduce the use of non-renewable virgin plastic in our packaging | | | | | | |
| - Achieve our goal of using 50% recycled content in our plastic packaging | 50% | 10% | 7% | 6% | Metric assured since 2021 | |

¹ Measured versus a 2020 baseline

² Our total beverage servings account for all beverage sales volume. Reuse models may include, but are not limited to, SodaStream, fountain beverages delivered in reusable containers, returnable glass and plastic bottles, and concentrates and powders sold to consumers

³ Fountain beverages delivered in reusable containers requiring third-party data are not currently measured

⁴ At the time we announced our new reuse goal, we estimated that approximately 10% of our beverage servings were already in reusable packaging. Fountain beverages delivered in reusable containers requiring third-party data are not currently measured

¹ PepsiCo considers packaging to be recyclable, compostable, biodegradable or reusable (RCBR) if certain end-of-life waste management criteria is achieved. See <u>Calculation methodology</u> on ESG Topics A-Z for an explanation of how we calculate the percentage of our packaging that is RCBR

Positive Value Chain: People

Metrics marked with a star signify third-party limited assurance

Target metrics 2030 Target 2023 2022 2021 Comments

PROVIDE MEANINGFUL JOB AND GROWTH OPPORTUNITIES SO THAT OUR PEOPLE ARE BETTER POSITIONED TO MAKE POSITIVE IMPACTS AT WORK, AT HOME AND IN THEIR LOCAL COMMUNITIES.

Increase the employability of our people through increased access to degrees, skill development and new roles, providing meaningful growth opportunities to everyone at every stage

Our actions include:

- Continuing to provide fulfilling growth opportunities and career advancement programs through a variety of programs such as PEP U Degreed. In 2023, employees completed more than 1.5 million hours of learning
- Supporting our associates through our internal talent marketplace myDevelopment.
 In 2023, more than 300 associates were assigned and took part in short-term projects or new opportunities
- Continuing to offer tuition-free opportunities for all U.S. employees to acquire new skills or refine existing ones through myEducation. In 2023, more than 450 employees completed a degree or program

See additional information within our Employee learning and development page in ESG Topics A-Z.

Empower our associates with the resources and time needed to build and cultivate prosperity in our communities

Our actions include:

- Expanding the One Smile at a Time program to more than 50 countries around the world, doubling country count compared to prior year and increasing the number of volunteer events within our communities
- Embedding volunteerism into programming throughout 2023, including Global
 Volunteer Month in April and PepsiCo Gives Back Month in October which totaled to
 more than 85,000 volunteer hours during these two months alone. In 2023, employees
 donated more than 163,000 hours in volunteering actions around the world

See additional information within our <u>Philanthropy</u> page in ESG Topics A-Z.

ADVANCE EQUALITY, INCLUSIVITY AND HUMAN RIGHTS FOR OUR PEOPLE, ACROSS OUR COMMUNITIES, SO THAT TOGETHER WE CAN ENVISION A BETTER WORKPLACE AND WORLD BY:

2030 Target

Continue to make measurable progress against our Racial Equality Journey goals in the U.S.

| Achieve 10% Black representation in U.S. managerial populations ¹ | 10% (2025 Target) | 9.2% | 9.0% | 8.3% | |
|---|-----------------------------|-------|-------|------|--|
| Achieve 10% Hispanic representation in U.S. managerial populations ¹ | 10% (2025 Target) | 10.3% | 10.1% | 9.5% | |

2023

Our actions include:

- Continuing to increase our engagement and programs at colleges and universities to cultivate and increase hiring of underserved talent
- Continuing to tailor our tools, resources and skill-building programs to elevate business impact, while ensuring DEI is embedded across the talent lifecycle as we strive for equitable outcomes
- Continuing to expand our diverse supplier base across our value chain, and investing in diverse-owned businesses by providing business-building support services
- Continuing to benchmark ourselves across industry peers to ensure our continual progress

See additional information within our <u>Diversity</u>, <u>equity</u> <u>and inclusion</u>, <u>Supplier diversity</u> and <u>Employee recruitment</u> pages in ESG Topics A-Z.

| Achieve and sustain 50% women in management roles | 50% (2025 Target) | 45% | 44% | 43% |
|---|-----------------------------|-----|-----|-----|
| Achieve and sustain 50% women in management roles | | 45% | 44% | 43% |

Achieve and sustain pay equity for our global professional population by maintaining a comprehensive global pay equity review process²

Continue to help address inequalities for historically marginalized people

Women and men continue to be paid within 1% of each other³

Extend the principles of our Supplier Code of Conduct to all of our franchisees and joint ventures by 2025

(2025 Target)

Our objectives include:

• Engaging with our franchisee and joint venture partners on our human rights agenda and priorities

2022

2021

Comments

See additional information within our <u>Human rights</u> and <u>Sustainable sourcing</u> pages in our ESG Topics A-Z.

and underserved businesses and communities

¹ To reflect workforce availability of the communities where we operate

² After controlling for legitimate drivers of pay such as job level, geographic location, and performance ratings; based on base compensation

³ Based on pay equity program implemented in 71 countries that collectively made up more than 99% of our salaried employee population in 2023, 72 countries included in 2021 and 2022 analysis, representing more than 99% of salaried population

¹ Results reflects lost time incidents per 200,000 hours worked

² Results reflect the exclusion of SodaStream

³ Results reflect the exclusion of SodaStream and Pioneer Foods

⁴ Metric counts the cumulative number of people provided with access to safe water since 2006

⁵ Results represent the cumulative sum of people reached with nutritious meals per annual reporting period through programs funded by the PepsiCo Foundation, as well as through commercial efforts that are intended to provide nutritious meals. Initial target setting for this metric did not include Pioneer Foods, which delivered accessibility to more than 20 million people in each reported year. The target will be reassessed in the future to fully account for both commercial and charitable efforts. See <u>Calculation methodology</u> in our ESG Topics A-Z for further explanation of how we calculate this goal
